Information Disclosure Statement

All the reference of the information disclosure statement filed 11/18/2007 have not been considered because, while applicant has provided brief description of what is disclosed by each of the reference to encourage their consideration, the description does not include how the references may be applicable to the claims of the instant application. Again, it would be helpful for the IDS to be limited to those references which are relevant to the claims of the instant application so that they may be given proper consideration.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3677

Claims 61-84 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 39, 40, 42, 43, 47, 51, 52, 54, 55, 59, 63, 64, 66, 67, 70, 74, 75, 77, 78, 81, 85, 86, 88, 89, and 92 of copending application No. 10/430,794 and over claims 18-20, 22-34, 36-48, 50-62 and 64-73 of copending application No. 11/444,672 in view of Hunckler (US 3,877,502). The claims of 10/430,794 and 11/444,672 claim the same features as the instant application except for the shaft having the thread at both ends. Hunckler discloses a fastener having a shaft with a thread as both ends (26 and 27). It would have been obvious for the skilled artisan to provide the claimed threads of 10/430,794 and/or 11/444,672 onto both ends of the shaft as disclosed in Hunckler in order to form an improved U-bolt for applications such as those disclosed in Hunckler.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

Claims 61-84 would be allowable with the filing of a proper Terminal Disclaimer for at least the same reasons as the claims of 11/444,672 were indicated as allowable.
